

VOLCANO participate the Exhibition, “SMM Hamburg 2016”

VOLCANO exhibits the products at “SMM Hamburg 2016” held at Hamburg Exhibition Centre and Congress Centrum, from 6th to 9th September 2016. VOLCANO welcomes the respective visitors at our exhibition booth “619.16” in **Japan Pavilion, Hall B7**.

About SMM Hamburg 2016

Venue:	Hamburg Messe & Congress Centrum in Hamburg, Germany
Organizer:	Hamburg Messe und Congress GmbH
Venue Size:	85,000 square meter
Visitor expectation:	above 50,000 people

VOLCANO has products and solution for LNG (Liquefied Natural Gas) utilization, based on our experiences on Oil/Gas combination burner for Marine-use, Gas burner for Industrial-use and Ultra-low NO_x burner. Two new products for LNG fueled vessel (as below) presented at our booth give you solutions for increasing LNG-use and tightening of environmental regulation in future. And we also show another product “BILCON-X”. It has been contributing for a long time to environmental-load-reduction by removing water from bilge and sludge in vessels safely. These products meet requirements of environmental protection, which satisfy growing awareness of environment in the world or tightening environmental regulation by IMO (International Maritime Organization).

Waste-Oil/Bilge Concentrator “BILCON-X”

Exhibited Products

[New Product]

1. Oil/Gas Combination Burners for LNG Fueled vessel “**Vignis-mini**” 1/3 scale replica

[New product]

2. Gas Combustion Unit for LNG Fueled vessel “**MECS-GCU**” 1/5 scale replica

3. Waste Oil/Bilge Concentrator “**BILCON-X**” 1/5 scale replica
