Japan Ship Machinery and Equipment Association,
JETRO

VOLCANO provides products for LNG as fuel and solution for LNG utilization, based on our experiences on HFO/Gas combination burner for Marine-use, Gas burner for Industrial-use and Ultra-low NO_x burner for Industrial-use. Two new products for LNG fueled vessel will be exhibited at SEA JAPAN 2016, because the utilization of LNG as fuel will be enhanced more and more. And also, one product with established reputation for environmental-load-reduction by removing water from the bilge or the sludge in vessels safely. These products meet the requirement for environmental protection, which satisfy growing awareness of environment in the world or tightening environmental regulation by IMO(International Maritime Organization).

**Bilge Concentrator
“BILCON-X”**
